

Dr. Sathish Palayam

399 County Street
New Bedford MA, 02740
(781) 698-7136
sathish.palayam@gmail.com

Dr. Sathish G Palayam, received his Doctor of Dental Surgery from The University of Colorado School of Dentistry, with a fellowship in Oral and Maxillofacial surgery and a subspeciality in TMJ and orofacial pain. Combined his lifelong passions for medicine and computer technology, emerged as a revolutionary force in contemporary dentistry.

While implementing cutting edge technology in private practice, he also travels educating thousands of dentists on integrating two exciting, fast growing technologies.

Dr. Sathish is the first surgeon to implement a Robotic assisted dynamic navigation system, an implant surgical protocol along with 3D cone beam computed tomography (CBCT), and a complete Digital workflow from consultation to a restorative driven surgical prosthesis for full arch implant supported prosthetics in surgical dentistry with predictable outcomes. Both systems work great independently but a magical thing happens when they communicate with each other. The end result is absolute precision. We can deliver results within a fraction of a hair, or 100 microns of accuracy (100 microns is one tenth of a millimeter). Dr. Sathish travels extensively in the U.S and overseas to train clinicians.

EXPERIENCE

Harvard University School of Dental Medicine, Boston, MA (USA) *Faculty*

Private Practice , New Bedford, MA (USA)

Bharati Vidyapeeth Dental College And Hospital, Pune, India — *Assistant Professor*
